Experience

Frontend Engineer - SasaPay | Nairobi, Kenya

August 2025 - Present

- Re-architected the SasaPay Merchant Portal's authentication flow using Next.js middleware, secure cookies, and server actions for server-side token handling. As verified by the Security Team audits, this eliminated CSRF and XSS vulnerabilities.
- Introduced a Turborepo-based monorepo architecture that unified all front-end portals, eliminated duplicated code, and enabled shared UI/utility packages. This reduced feature development and new project set-up time by 50%.
- Re-designed merchant portal workflows, reducing key task actions by 15% and consolidating all payment actions into a unified interface, enabling merchants to view and manage all payments and wallet balances from a single page.
- Introduced meaningful, actionable error messages with clear recovery steps to SasaPay systems, reducing support requests as communicated by the customer support team.
- Redesigned and improved the SasaPay Developers Portal UX, leading to a 45% reduction in developer error reports as presented by the Support Team, and faster partner onboarding as noted by the Business Development Team.

Frontend Engineering Lead - Must Company | Seoul, South Korea

April 2024 - July 2025

- Executed component and end-to-end tests using Jest and Cypress, reducing errors and enabling smoother, more reliable releases, protecting product stability, and supporting faster delivery cycles.
- Improved the Msquare application UI, incorporating Formik for form handling, ensuring robust validation and error messaging. These enhancements contributed to a 12.5% increase in user satisfaction and a 18% decrease in user-reported errors.
- Delegated tasks to junior developers and supported them through implementation, doubling our feature delivery speed by 2x.
- Onboarded new developers by walking them through the company codebase and products, helping them contribute 3x faster than before.

Frontend Engineer - Stream4Tech LLC | Virginia, United States

July 2023 - June 2024

- Conducted enhancement of the company's component library built on Material-UI, reducing code redundancy across projects by 25% and uplifting software engineering productivity by 30%.
- Oversaw the maintenance and feature enhancement of the company's software applications, using React, Redux and Material UI, leading to a 20% increase in application performance in terms of rendering and security.
- Collaborated in sprint planning, daily stand-ups, and feature review meetings to align development efforts and maintain consistent delivery across teams.
- Created detailed documentation across multiple frontend projects, helping developers onboard faster and encouraging consistent code reuse.

Senior Frontend Engineer - TheBhub | Nairobi, Kenya

August 2023 - March 2024

- Built Dagizo, a digital menu platform for restaurants and hotels using Next.js, Material UI, and Axios, featuring a modern, user-friendly interface that increased the company's visibility by 7% and attracted new customers.

- Led client demo sessions and feedback cycles, providing the team with clear insights into product strengths and areas for improvement, resulting in more focused and effective development.
- Worked closely with designers, backend engineers, and project managers to build software solutions that matched each client's exact needs, helping improve overall client satisfaction by 8%.

Frontend-Engineer - Lipana Tech | Nairobi, Kenya

February 2023 - June 2023

- Redesigned and developed the Lipana payment system user interface leveraging the latest technologies such as React, Material UI, Redux, and Tailwind CSS. This increased the number of customers by 35%.
- Designed, developed, and maintained other Lipana software systems and products that meet the company's business requirements, resulting in a 19.5% reduction in system bugs.
- Met regularly with the product management team to define software requirements and create detailed technical specifications.

Frontend Engineer - IAESTE | Nairobi, Kenya

March 2021 - February 2023

- Maintained and enhanced the IAESTE internships application system using React and Tailwind CSS, improving usability and increasing submission efficiency by 20%.
- Managed application deployment and cPanel tasks, including email setup and backups, improving communication and ensuring reliable information flow.
- Implemented UI components and form validation under guidance, contributing to smoother workflows and better user experience for students.
- Built interactive components, optimized page layouts, and improved navigation for the IAESTE website using React and Tailwind CSS, resulting in a 10% increase in weekly internship applicants.

Projects

My Studio – Project-Focused Storytelling Platform | <https://github.com/amoskyalo/my-studio>

Technologies: React Native, Expo, GraphQL

- Developed My Studio with React Native and Expo SDK 54, working with complex navigation flows, real-time updates, image handling, and cross-platform layouts, gaining hands-on experience with modern mobile development patterns and the Expo ecosystem.
- Integrated GraphQL APIs with Apollo Client in React Native, structuring queries and mutations, managing client-side caching, and handling real-time data synchronization to build practical experience with GraphQL implementation in mobile applications.

Skills

Languages: Typescript, JavaScript (ES6), C

Frameworks: React.Js, Next.Js, React Native, TailwindCSS, Material UI, Shadcn

Tools and Skills: Redux, Expo, Firebase, GraphQL, Git, GitHub, Linux, Rest APIs, NPM

Education

Muranga University of Technology

September 2020

- Bachelor of Science in Electrical and Electronics Engineering
